

Using the Classroom Overview page

When you login to Math Buddy, you are taken to the Teacher Dashboard. From here, you can access all the classrooms you are associated with.

To enter a classroom, click on the classroom name. You will be taken into the Classroom overview page for that classroom.

You can access all the features relating to the selected classroom using the classroom overview page.

- You can access the activities using the Activity Center
- You can access interactive worksheets (smart sheets) and assessments from the Worksheet center
- You can get detailed reports about the students' usage and performance using the Student reports page
- You can create and manage your lesson plan
 - You can create your own topics and organize Math Buddy activities and worksheets under them
 - Saves a lot of time later since you do not need to search for these.
- You can manage your student roster – create new student accounts, access existing students' usernames and reset their passwords as required, delete student accounts
- Discussion forum to engage in a healthy discussion with the students in your classroom
- You can also manage the assigned activities, worksheets and assessments from this page.

- Towards the bottom of the page, you will see the Math Buddy Wall of Fame for this classroom. This shows the names of the top ten students who have obtained maximum number of points by using the activities, smart sheets, assessments and the Question of the Day

You can also access the Math Buddy Question of the Day for this grade right from your Classroom Overview page.
